U.S. Army Combat Readiness Center Announcement

As of March 15, ASMIS-2 officially became TRiPS, or Travel Risk Planning System.

While elements of ASMIS-2 remain the same – such as inputting information like the type of vehicle being driven, age, start and end points, expected sleep before traveling, seat belt use and more – TRiPS offers more than just a name change. The tool offers additional features specifically for supervisors. One of the new features allows supervisors to view the TRiPS activity of their subordinates two levels down, which offers more opportunity for leadership engagement and awareness.

For more information on TRiPS or to fill out an assessment, visit the **USACRC homepage** at <https://crc.army.mil>.
